

✓ Sands down to bare wood

✓ Efficient grinding of concrete

✓ Easily interchangeable segments

✓ For all sanding challenges

Bona FlexiSand Pro System Tools

Tools for greater power and versatility

Bona FlexiSand Pro System Tools

Tools for greater power and versatility

Bona FlexiSand Pro System is our innovative answer to a simpler and smoother working process – one flexible solution for all flooring challenges. These fully compatible tools include state-of-the-art sanding disc drives that can be attached to Bona FlexiSand 1.5 or 1.9. Enjoy efficient and direction-free sanding down to bare wood, intermediate sanding, fine sanding, or even grinding of concrete surfaces, with astonishing results.

Wood floor sanding

✓ Bare wood sanding

Bona Power Drive

The Bona Power Drive delivers optimal performance in bare wood sanding. Equipped with geared rotating discs, its unique design ensures direction-free sanding and high power.

✓ Intermediate and fine sanding

Bona Quattro Disc

Bona Quattro Disc, with four grinding plates (150 mm), is perfect for reducing and smoothing out drum marks and rotational scratches from edger machines.

✓ Intermediate and fine sanding

Bona Multidisc

Bona Multidisc, with six plates (125mm), takes fine sanding performance to the next level. It is the perfect sanding tool before staining wooden floors, oiling with pigmented oil or applying finishes.

✓ Buffing

✓ Cleaning

Bona Pad Drive

The Bona Pad Drive is delivered with Bona FlexiSand machines. Bona Pad Drive is a multi-purpose tool that can be used with a pad to oil, stain, or for intermediate sanding of wooden floors.

Concrete sanding

✓ Magnetizing fixing for easily interchangeable segments

Bona Concrete Disc

Unique drive plate for easy fitting of different types of sanding segments. Magnetic fixing allows quick and easy change of segments, including Diamond, PCD Split, and PCD Maxi.

✓ Removes polyurethane, thin adhesives residues and paint

PCD Split Segment

The PCD Split Segment is attached to the Bona Concrete Disc for removal of polyurethane, thin adhesive residues and paint.

✓ Removes thick adhesives residues, epoxy and carpet foam

PCD Maxi Segment

The PCD Maxi Segment is attached to the Bona Concrete Disc for removal of thick adhesive residues, epoxy and carpet foam.

✓ Removes sinter layers

✓ Preparation of concrete surfaces

Diamond Segment

The Diamond Segment is attached to the Bona Concrete Disc for removal of sinter layers and preparation of concrete surfaces.
