KEY BENEFITS

- Extending the life of your tools
- Ergonomic handling
- Easy to use and time saving

PROTECT YOUR TOOLS

When sanding floors tools are often carried back and forth between the car and job sites. This increases the risk of wear and tear on the tools, and in the worst case, that they break. Protecting and storing your tools safely is important and will extend their life.

The Bona Box System consists of two robust boxes, Bona Box XL and Bona Box L. The two boxes are mainly intended for accessories for the Bona Flexisand. Each box has an inlay specially designed to protect your tools in the best way. As part of the system, is also a cart for a simple and smooth transport of the boxes.

TAKE CARE OF YOURSELF

Renovating a floor requires a variety of tools, ranging from heavy machines to accessories such as drive plates, sanding discs and abrasives. Many of the tools used when sanding can be unwieldy and heavy to carry. By using the Bona Box System you not only protect the tools, but you also save your back from non-ergonomic lifting.

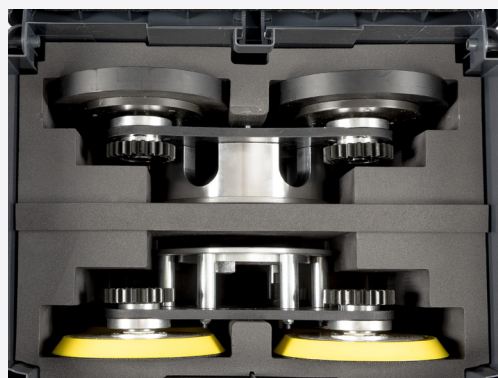

You will also save time by organizing and storing the tools in a smart way. Take everything with you at once instead of having to go back and forth several times.

KEEP EVERYTHING ORGANIZED

Being a professional craftsman is not just about how well you carry out your work but also what impression you give. By giving an organized impression, you will strengthen your brand.

BONA BOX XL

- Bona PowerDrive
- Bona PowerDrive Connect
- Bona Quattro Disc
- Bona Concrete Disc

BONA BOX L

- Bona ErgoEdge
- Abrasives
- Brushes
- Other accessories
