

# Bona<sup>®</sup>

Passion for wood floors

Established in 1919, Bona is a world leading innovator with a unique system for wooden floor treatment. Through subsidiaries and distributors we have local presence in more than 90 different countries enabling us to be close to our customers and craftsmen.

Our long commitment and passion for wooden floors enable us to offer lasting, sustainable results that meet all wooden floor needs for professionals and floor owners alike.

# RISE UP!

Bona ErgoEdge for standing edge sanding

REVOLUTION  
IN SANDING

CLOSER TO WALL

CLOSER TO SKIRT

# CLOSER AND WIDER

## FOR FASTER, EASIER SANDING

Sanding just got better. With a constant focus on better work processes and results, the Bona FlexiSand range lifts sanding to a higher level with the Bona ErgoEdge for faster, upright, ergonomic sanding.

The new Bona ErgoEdge enables you to sand wider and closer than ever. Thanks to its 178 mm wide curved discs you can now perform 90% of all edge sanding while standing upright, without changing machine.

Together with Bona FlexiSand and the wall distance wheel you can experience faster, simpler sanding in an upright, ergonomic position, with optimal control. Enjoy improved sanding with the innovative Bona ErgoEdge.

- ✓ ERGONOMIC
- ✓ FASTER

90%  
LESS  
TRADITIONAL  
EDGING

## AN UPLIFTING EXPERIENCE

Edge sanding is an integral part of all sanding. Special edge sanders give you the right reach and control of corners and edges, but edge sanding is often time-consuming, as well as a gruelling, with a lot of time spent kneeling. With Bona

ErgoEdge, a normal working day with 3.5 hours spent crouching on the knees can now be reduced to a mere half an hour, transforming a gruelling process into an uplifting sanding experience that you can enjoy.

# EMPOWERING SANDING

With Bona ErgoEdge, sanding not only becomes less demanding, but also much simpler and faster. In fact, an estimated 90% of all edge sanding can be covered standing,

making the job easier and faster. The wider discs also enable more surface to be covered in one go, thereby reducing the number of turns needed for a perfectly abraded surface.

## CLOSER

Floor surfaces close to walls can easily be sanded at the same time as the rest of the floor, without changing machines. It also minimizes the hassle associated with edge sanders when sanding corners, stairs and behind radiators.

SIMPLICITY

## ERGONOMIC

Reduce time spent crouching or kneeling by 70% with the Bona ErgoEdge. Working in an upright position enables a much more ergonomic working process and reduces the strain on the body.

UPRIGHT  
SANDING

## FASTER

Enjoy double sanding speed thanks to the larger width of the Bona ErgoEdge. The aggressive force of its reflex technology, in combination with the Bona PowerDrive Connect, enables bigger areas to be abraded in less time.

DOUBLE  
SANDING

# BONA ERGOEDGE

The key to the unique performance of the Bona ErgoEdge lays in the system philosophy of the Bona FlexiSand family. The Bona ErgoEdge is specially developed to be mounted on the Bona PowerDrive and attached to the Bona

FlexiSand 1.9 for maximum power and performance. Together, the Bona FlexiSand family gives you the force and control needed to secure a simple and fast sanding process.

## CLICK ON MOUNT

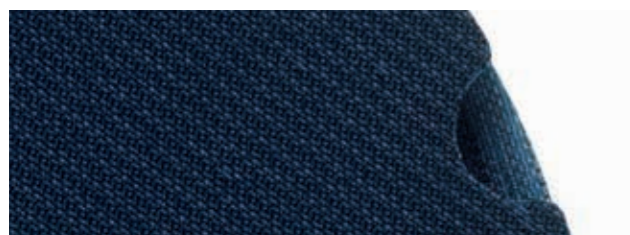

The pads are securely fastened in just a click

## WALL DISTANCE WHEEL

Prevent damages of the skirting and wall.

## INTERMEDIATE PADS

The pads are made from a special, soft, spongy material on the front, with a robust Velcro back and three slots for easier abrasive disc removal.

## UNIQUE SHAPE

The conical plate with 3 mm central depressor for upper peripheral pressure, ensures perfect centering of the Bona PowerDrive Connect.

PREVENTS  
DAMAGE

## WALL EDGE GUARD SET

Wall distance wheel - for maintaining the correct distance from the wall, preventing damage to skirting boards or walls. Easy adjustment and mounting, on the right or on the left FlexiSand chassis. The wheel is in stainless steel and supports a 3 mm thickness.

## WIDER DISCS

The larger diameter of the disc is perfect for covering the maximal area in conjunction with the Bona FlexiSand. Reaching all the way to the edge of the skirt, it enables precision and control of the abraded track.

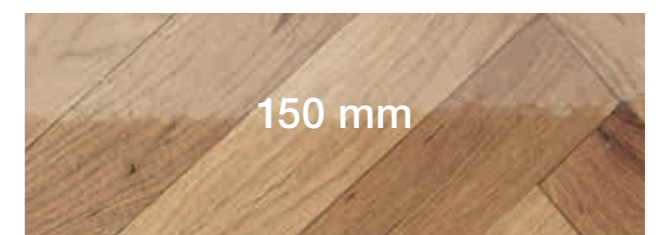

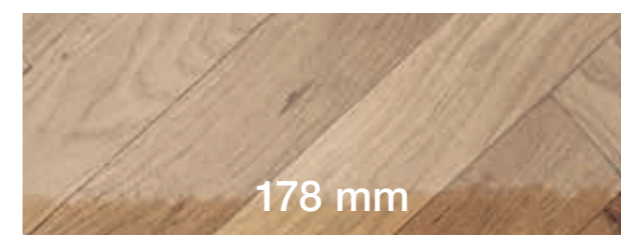

WIDE  
REACH

## CLOSER TO WALLS WITH 178 MM DISCS

The dramatic increase in reach is clearly demonstrated when comparing an area abraded with standard 150 mm discs to abrading with the 178 mm diameter width of the

Bona ErgoEdge. The size also makes it compatible for use with the same abrasives as your edge sander, reducing the amount of materials needed for the job.

# EXPANDING THE SCOPE IN SANDING

## BONA FLEXISAND PRO SYSTEM – A VERSATILE SYSTEM

Bona FlexiSand is a powerful machine that can be equipped with many sorts of drive plates for a wide variety of floor preparation jobs, such as sanding down to the bare wood, fine abrading, sanding resilient surfaces and concrete

grinding. With its powerful 1.9 kW motor and robust construction, it runs smooth and stays cool, even under a heavy workload.

## BONA POWERDRIVE **CONNECT**

Using a unique direction-free sanding and brushing technique, Bona PowerDrive Connect combines excellent performance with easy operation. Mounted on the Bona FlexiSand, it can remove thick layers of lacquer, replacing the need for conventional belt sanding. Its click-on mount enables you to switch between disc and brush within a minute. The drive plate is easy to manoeuvre in small, confined spaces and can be used regardless of the direction of the wood.

## EDGE SANDING

### BONA ERGOEDGE

The new Bona ErgoEdge enables you to sand wider and closer than ever. Thanks to its 178 mm wide curved discs you can now perform 90% of all edge sanding standing upright without changing machine.

## COARSE, MID AND FINE SANDING

### BONA SANDING DISC

Intermediate disc for mounting velcro abrasive discs. Perfect for reducing and smoothing out drum marks and rotational scratches from edge sanders.

## BRUSHING EFFECT

### BONA WIRE BRUSH

The Bona Wire Brush is mounted to the PowerDrive Connect using specially designed click-on technology. The metal brush is used on sanded wood to create a brushed, textured surface.

## RESILIENT STRIPPING

### BONA DIAMOND BLADES BONA RESILIENT BRUSH

Bona Diamond Blades are the ideal choice for speeding up stripping of Resilient floors. Bona Resilient Brush is designed for cleaning and sanding of structured resilient floors.

# COMPLETE YOUR SANDING EXPERIENCE

## FOR STAIRS AND HARD-TO-REACH AREAS

For professionals, by professionals. The Bona Edge UX is easy to use and includes key benefits such as safety features and dust free sanding. The design of the sanding arm helps you reach all nooks and crannies.

## FOR LARGER SURFACES

Working with large floor surfaces can involve a time-consuming sanding process, but the Bona Belt UX – a heavy-duty belt sander with tremendous power – makes any job quick, smooth and easy. The Bona Belt UX gives you a smooth sanding experience from the moment you lower the drum.

## BONA NET CERAMIC FOR WOOD

Bona Net Ceramic is designed for medium sanding or the removal of joint fillers, such as Bona Mix & Fill Plus, with minimal risk of clogging. The special net structure enables dust free sanding and maintains the highest abrasive performance. The ceramic grain provides the highest removal rate and outstanding durability.

## BONA ABRASIVES FOR ALL USE

The key to great sanding results lies in the perfect combination of machines and abrasives. Bona offers a wide range of abrasives, from the superior Bona Platinum 8700 Ceramic Abrasive made of ceramic grits for easy removal of hard lacquers and the anti-static Bona Blue 8300 Zircon Mix Abrasive, to our unique Bona Diamond Abrasive, for an unrivalled performance.

# SUSTAINABILITY AND HEALTH

## DUST-FREE SANDING

The Bona Abrasives range includes products with anti-static properties, which repel dust from the disc surface. The dust may then be contained more easily using the Bona DCS (Dust Containment System) or similar, ensuring improved working conditions for the craftsman.

Bona DCS 70 is an innovative, highly effective dust containment and air filter system. With a 70 litre dust holding capacity, the Bona DCS 70 contains all the sanding dust within the machine. Bona DCS 25 meets the toughest requirements for vacuum cleaners within the industry today. The machines are ideal for the collection of fine and health hazardous wood dust from sanding machines.
