# UPGRADES FOR BETTER SANDING

## Accessories for Bona FlexiSand 1.9

The powerful and versatile Bona FlexiSand is the pioneering world leader in direction-free sanding. An innovative system with a range of tools capable of various floor preparations. The smart, compact design makes it both capable and easy to handle.

Now, we are adding three new user-friendly features - surrounding ambient LED lights, a kickstand to avoid pressure on discs and a magnetic click-on weight - that can be retrofitted on your existing Bona FlexiSand.

## KICKSTAND

The kickstand protects the floor surface and the machine. It allows for safe and easy handling during abrasive and sanding plate changes.

## MAGNETIC WEIGHT

A new magnetic click-on connection with an optimized 11 kg weight for an easy switch of the load depending on the sanding operation.

## 360° LED LIGHT

The new surround LED light bar with a more intense, clear, and cold light leaves no shadow from the machine dispersing light evenly around for perfect floor visibility.

## LED LIGHT

### KEY BENEFITS

- 360° full clarity of work area
- No shadow from the machine

### TECHNICAL DATA

- 230 V
- Could work as stand alone

## KICKSTAND

### KEY BENEFITS

- Protecting discs and surface
- Safe and easy to handle

### TECHNICAL DATA

- Rubber wheels
- Strong steel construction

## MAGNETIC WEIGHT

### KEY BENEFITS

- Simpler handling
- Click on, click off
- Balanced weight

### TECHNICAL DATA

- 11 kg weight
- 2-points magnetic attachment
