Bona Pet System™ Premium Pet Microfiber Mop

for Multi-Surface floors

The ultimate floor cleaning tool for homes with pets.

INSTRUCTIONS FOR USE

Step 1: Dry clean first with the purple Bona Pet System™ Microfiber Sweeping Pad, just like rubbing a balloon on your head attracts hair to the balloon, the simple action of the Bona Pet System™ Microfiber Sweeping Pad gliding across the floor creates an electro-static charge which attracts pet hair, dust, dander, and allergens to the mop head where they are trapped in the fingers.

Note: To create and maintain its electro-static charge the purple sweeping pad must remain completely dry. If there are any liquids on the floor, they should be dried up first before using the sweeping pad.

Step 2: Change to the blue & green Bona OxyPower™ Microfiber Deep Cleaning Pad which is designed to be used with Bona Pet System™ Wood Floor Deep Cleaner or Bona Pet System™ Hard Surface Floor Deep Cleaner. Use the cleaner appropriate for your floor. The unique patented PowerLoop® technology gently breaks apart and loosens the toughest dirt build-up. The dual-zone cleaning action includes dark blue outer fibres for breaking up grime, while the light blue inner fibres trap and absorb dirt.

Bona Pet System™ cleaners contain Odour Guard Technology™ which instantly eliminates and neutralises urine and other organic odours and continues to work for up to 5 days.

How often you need to clean your floor depends on local conditions. Bona Pet System Cleaners are suitable to use daily.

CARE

All Bona Microfibre pads are suitable for machine or hand washing and can be washed up to 500 times whilst maintaining their effectiveness. Do not use fabric softeners.

Tip: To ensure the best electro-static charge possible tumble dry the purple Bona Pet System Microfiber Sweeping pad.

Never leave your mop standing with a wet cleaning pad face-down on the floor surface when done cleaning – this may cause permanent damage to your surface.
