# Bona Wood Floor Refresher

For lacquered wood floors

**Extends the life of your floor's finish**

## PREPARATION

Remove loose dirt and grit from your floor. Clean floor thoroughly with Bona Wood Floor Cleaner or Bona OxyPower Wood Floor Deep Cleaner (sold only in selected markets) and let dry. It is important that the floor is thoroughly clean as otherwise the dirt will be sealed onto the floor by the coat of Refresher and an uneven, unsightly appearance will result.

**IMPORTANT! Do not use on any floor that has been waxed or oiled. Wax and oil residues will prevent proper adhesion of Bona Wood Floor Refresher to the floor. If uncertain, perform a small test before use to ensure desired result.**

Shake bottle thoroughly before use and apply at normal room temperature, 18-25°C.

## INSTRUCTIONS FOR USE

1. Pour a wide, line of Bona Wood Floor Refresher on a small section of the floor.
2. Immediately spread the product over the section using a Bona Microfiber Applicator Pad.
3. Complete the section by smoothing with the applicator pad in the direction of the wood.
4. Continue section by section until the entire floor has been treated.

The floor can be walked on after 2 hours but avoid heavy traffic and replacement of furniture and rugs until after the first 12 hours.

## MAINTENANCE

Regularly clean your floors with Bona Wood Floor Cleaner and a Bona Microfiber Cleaning Pad. When the floor is starting to show signs of wear and needs freshening up, clean and apply a new layer of Bona Wood Floor Refresher. If at any time you wish to remove Bona Wood Floor Refresher from your floor, you can do so using Bona Polish Remover.
